🔗 hamdyx.dev

Frontend Software Engineer with 6+ years building scalable React and TypeScript applications in monorepo architectures. Proven track record reducing bundle sizes by 60%, improving load times by 50%, and driving 100% test coverage across enterprise platforms. Experienced in shared component libraries, CI/CD, and AI-assisted development workflows, including authoring custom Copilot agents for end-to-end agentic PR delivery.

WORK EXPERIENCE

Secret Escapes Software Engineer *FEB 2025 - PRESENT*

- Built and shipped features across a Yarn 4 monorepo of 3 React + TypeScript SPAs (Vite, Apollo Client, Ant Design) serving internal supply, partner, and provider admin tools.
- Authored Copilot custom instructions and configured specialized agents (implement, test, code-review, refactor, docs) used in agentic PR workflows to deliver production tickets end-to-end.
- Collaborated across a Jira Kanban workflow, from backlog refinement and daily stand-ups through staging and production releases via Jenkins CI/CD pipelines, to deliver well-tested, accessible (WCAG compliant) UI flows end-to-end.
- Maintained shared component and utility libraries, including accessible Ant Design patterns with ARIA labels, and keyboard navigation, enforcing 100% unit test coverage and consistent APIs across the monorepo.

RasMal Frontend Engineer *OCT 2022 - SEP 2025*

- Led a major refactor of core React/TypeScript modules, modernized component structure, replaced legacy state patterns, and improved load times and responsiveness across key user flows by ~20%.
- Restructured application routing with protected routes and route-level lazy loading (code-splitting), cutting initial bundle size by ~60% and improving Time-to-Interactive on first load.
- Collaborated with backend engineers, product managers, and designers to deliver end-to-end features, translating Figma designs into reusable, accessible React components and integrating with REST APIs.

Taqneen Solutions Senior Frontend Developer *JULY 2022 - NOV 2022*

- Designed and shipped 5 product features using React, TypeScript, and Redux Form, including dynamic form builders driven by JSON schema configurations.

Uniparticle Junior Frontend Developer *MAR 2022 - JULY 2022*

- Implemented on-page SEO best practices (semantic HTML, meta tags, structured data) that lifted target keywords into top-5 Google search rankings for the company's primary market.

EDUCATION

British University in Egypt BSc Computer Science

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, HTML5, SCSS, SQL

Frameworks: React.js, Next.js, Redux, Express.js, Node.js

Testing: Jest, Vitest, Cypress

Tools: Git, Vite, npm, Docker, Jenkins, Jira, Figma, Sentry, Webpack

Cloud/Other: AWS, MongoDB, GraphQL, REST, SEO, WCAG, Agile/Scrum, GitHub Copilot
