

AHMED HAMDY

SOFTWARE ENGINEER – REACT & TYPESCRIPT

Madinaty, Cairo, Egypt | a.hamdy.nig@gmail.com | +20 111 653 5636
github.com/Hamdyx | linkedin.com/in/hamdyx | hamdyx.dev

Software engineer with 6+ years building React and TypeScript applications in monorepo architectures. Led a five-person frontend team through an overhaul that cut an initial bundle by ~60%, and currently ships GraphQL-backed SPAs held to 100% unit test coverage at Secret Escapes. Runs a daily AI-assisted workflow built on custom GitHub Copilot agents and Claude Code.

WORK EXPERIENCE

Secret Escapes | Software Engineer

Feb 2025 – Present

- Build and ship features across a Yarn 4 monorepo of three React + TypeScript SPAs (Vite, Apollo Client, Ant Design) powering internal supply, partner, and provider admin tools.
- Maintain shared component and utility libraries with accessible Ant Design patterns (ARIA labels, keyboard navigation), enforcing 100% unit test coverage and consistent APIs across the monorepo.
- Authored custom Copilot instructions and configured specialized agents (implement, test, code-review, refactor, docs) that the team now uses in agentic PR workflows to deliver production tickets.
- Work a Jira Kanban flow from backlog refinement and daily stand-ups through staging and production releases on Jenkins CI/CD, shipping well-tested, WCAG-compliant UI.

RasMal | Frontend Engineer

Oct 2022 – Sep 2025

- Led a team of five frontend engineers, owning architecture decisions, code review, and delivery across the product.
- Drove a major refactor of core React/TypeScript modules: modernized component structure, replaced legacy state patterns, and improved load times and responsiveness on key user flows by ~20%.
- Restructured application routing with protected routes and route-level lazy loading (code-splitting), cutting the initial bundle size by ~60% and improving Time-to-Interactive on first load.
- Partnered with backend engineers, product managers, and designers to turn Figma designs into reusable, accessible React components integrated with REST APIs.

Taqneen Solutions | Senior Frontend Developer

Jul 2022 – Nov 2022

- Designed and shipped five product features in React, TypeScript, and Redux Form, including dynamic form builders driven by JSON schema configurations.

Uniparticle | Junior Frontend Developer

Mar 2022 – Jul 2022

- Implemented on-page SEO best practices (semantic HTML, meta tags, structured data) that lifted target keywords into top-5 Google rankings for the company's primary market.

Freelance | Frontend Developer

Apr 2019 – Mar 2022

- Designed and built 10+ custom templates and landing pages with React and Next.js for client projects, increasing traffic and engagement by 25%.
- Planned and executed tailored SEO and SEM strategies across multiple projects, boosting online visibility and search rankings by over 40%.

SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, HTML5, SCSS, SQL

Frameworks & Libraries: React.js, Next.js, Redux, Apollo Client, Node.js, Express.js, FastAPI

Testing: Jest, Vitest, Cypress

Tools: Git, Vite, Yarn, npm, Docker, Jenkins, Jira, Figma, Sentry, Webpack

AI Workflow: GitHub Copilot (custom agents), Claude Code, MCP integrations (Jira, Figma)

Cloud / Other: AWS, GraphQL, REST, MongoDB, PostgreSQL, SEO, WCAG accessibility, Agile/Scrum

EDUCATION

British University in Egypt – BSc Computer Science
